The instant, cold mist humidifier on legs

Appealing design

The mist is best absorbed by the ambient air when you place the device on a table or dresser. Its stylish wood-laminated legs, round shape and leather label makes Tag deserve a prominent spot in your room.

Ultrasonic technology

The ultrasonic technology directly ensures a visible mist. The mist is cold, making it safe for kids and pets. In addition, this technology is extremely quiet and highly energy-efficient.

Ten hours without refilling

Its large 2.5-liter water reservoir means Tag just keeps on going - for up to ten hours! The light on the bottom automatically starts blinking red when it's time to top it up.

Clean air output

The replaceable cartridge in the water reservoir prevents lime scale, both in the device as in the mist output. This means the humidifier is easy to maintain and does not release any white deposits as a result of lime scale.
