Retains >99,5% of dust

FC8031/00

Original EPA12 filter replacement from Philips

EPA12 filter captures more than 99.5% of fine dust

The Philips EPA12 filter for your vacuum cleaner captures 99.5% of the finest dust, for a dust-free environment. For optimal performance, the filter should be replaced once a year.

Philips Original accessories

- s-filter® standard fit for easy replacement
- EPA12 exhaust filter for excellent filtration
- Change every 12-months for sustained performance
- Non-washable filter

PHILIPS

Highlights

s-filter® standard fit

s-filter® is the standard exhaust filter that is widely available and easily recognizable by its logo. It fits several ranges of vacuum cleaners from Philips, as well as vacuum cleaners from Electrolux, AEG, Volta and Tornado.

EPA12 exhaust filter

The EPA12 filter captures more than 99.5% of fine dust, before the air is expelled back into the room.

This results in a clean, dust-free air in your home. The filter should be replaced once a year.

Change every 12-months

For optimal performance and filtration, we advise to change the filter every 12 months.

Non-washable

The filter does not need to be washed. It has a lifetime of 1 year, after which it needs to be replaced. Washing the filter can damage it.

Specifications

Contains

- Exhaust filter: 1

Suitable for
