Figure

- 1 Remove the battery cover from the mouse. Install two AAA batteries into the mouse.

- 2 Remove the battery cover from the keyboard. Install two AAA batteries into the keyboard.

Replace Batteries

If the mouse or keyboard does not work properly, then the battery may be low. Please check the battery level. Warning: do not mix or use different types of batteries at the same time.

Notes on Battery Usage

- When you use the battery, carefully read and strictly observe the Safety instructions and the notes described below.
- Different battery types and surrounding temperatures may affect the battery performance.
- Avoid using batteries in extremely cold environments as low temperatures can shorten the battery life and reduce wireless device performance.
- If you are using a non-rechargeable battery or rechargeable battery that has not been used for an extended period of time (batteries that pass the expiry date are exceptions) it might affect the period of time, according to local regulations, you can use this device. Therefore, to maximize their performance and lifetime, we recommend that you fully charge the batteries and discharge them for at least one complete cycle before use.
- The battery or wireless device may freeze when using for an extended period of time. This is normal and not a malfunction. If you will not be using the batteries for an extended period of time, remove them from the wireless device to prevent leakage or corrosion.
- Always keep the terminals in a clean state.
- Risk of explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to local regulations.

3

Plug the receiver into your computer

- 1 Connect both devices, wait 5-10 seconds and you are ready to begin

Mouse Button Assignments

1. Left Button: Provides traditional mouse functions like click, double click and drag.
2. Magic-Roller: Scroll the button to surf the Internet and Windows documents.
3. Right Button: Provides traditional mouse right click function.
4. DPI: 800 / 1200 / 1600
